

Manikanta Das KG

Senior Technical Writer

Authorized to work in Sweden on a 2-year dependent visa from 14 August 2026

www.linkedin.com/in/manikanta-das-kg

Senior Technical Writer with over 8 years of experience developing scalable, customer-facing documentation for enterprise platforms and diverse user audiences, including admins, end-users, and developers. Experience includes UI/UX writing, Docs-as-Code workflows, structured authoring using Oxygen XML Author, and branch-based documentation management using GitHub and Perforce. Skilled in managing end-to-end documentation for new features, from content planning and information architecture to release readiness and cross-functional collaboration with product, engineering, and UX teams. Experienced in AI-assisted documentation workflows using Cursor to support content authoring, reviews, ambiguity detection, documentation consistency, and reduction of documentation debt across high-volume release cycles.

EXPERIENCE

Senior Technical Writer, Salesforce, Hyderabad, India Jan 2024 – Aug 2026

- Led the end-to-end documentation strategy for Salesforce Life Sciences Cloud during an accelerated IQVIA OCE data model migration, delivering ERDs and object reference documentation for 300+ objects to support customer-facing enterprise readiness for strategic engagements.
- Managed end-to-end structured authoring workflows using repository-based documentation practices, including topic-based authoring, map assembly, content reuse (conref/keyref), and branch-based collaboration with engineering, product managers, and SMEs to improve consistency and reduce duplication of content across releases.
- Integrated AI-assisted documentation workflows using Cursor to support monthly release cycles, helping reduce documentation debt, improve review efficiency and content consistency, and increase delivery capacity across high-volume documentation areas.

Senior Technical Writer, ServiceNow, Hyderabad, India Apr 2022 – Dec 2023

- Owned end-to-end documentation for the Skills Intelligence Platform, delivering launch-ready customer documentation for enterprise workflows and enabling scalable self-service adoption across major releases.
- Created a centralized documentation intake and tracking workflow for product and engineering teams, improving visibility, triaging efficiency, and coordination of documentation requests while reducing dependency on individual writer communication channels.
- Reduced enterprise customer support tickets by 30% by developing self-service onboarding documentation for standard implementation paths.

Senior Technical Writer, Broadridge, Hyderabad, India Nov 2020 – Apr 2022

- Developed engineering enablement and onboarding content using Confluence, SharePoint, Camtasia, and Articulate Storyline, including interactive Jenkins training modules for new

engineering teams.

- Developed standardized internal global notifications in collaboration with engineering and product teams to communicate platform and technical updates across the organization.

PREVIOUS JOBS

-
- Lead Manager, Lumina Datamatics, Mumbai, India Sep 2019 – Nov 2020
Managed a team of writers and editors supporting legal publishing workflows for major clients including Wolters Kluwer, Thomson Reuters, and LexisNexis India.
 - Lead Associate, WNS, Gurugram, India Apr 2017 – Aug 2019
Managed end-to-end document development workflows for American Lawyer Media, overseeing authoring, editorial reviews, and publication activities for complex legal publications aligned with U.S. legal writing and publishing standards.
 - Lead Editor, HS Brands International, Bangalore, India Apr 2017 – Aug 2019
Managed a small editorial team responsible for reviewing and refining competitive marketing content submitted by users, ensuring adherence to company style guidelines and improving overall content clarity, consistency, and presentation.
 - Associate Publishing Specialist, Thomson Reuters, Hyderabad, India Nov 2013 – Oct 2015
Edited and maintained legal publication content across multiple Thomson Reuters products, managing XML-based editorial workflows, citation validation, and multi-format publishing outputs including PDF, ePub, and XML using Arbortext Epic Editor and Phoenix workflow systems.
